CSC 495: Mobile App Development

Spring 2015

Instructor: Mr. Andrew Schaefer

Time: M/W 3:30-4:45pm

Project-based course exploring concepts in Mobile App Development. Concepts that will be covered include: mobile programming environment, interface design, communications and connectivity, and application structure and design. We will also address limitations of Mobile Computing including memory constraints, display considerations, and limited power/battery life. The course will focus on the Android operating system.

Prerequisite: CSC330

Recommended: CSC340

Textbook: Beginning Android 4 Application Development
