

## Ski Resort Internships Available.

With Congress failing to pass the Visa regulations the ski resorts are short thousands of employees for the coming winter. I have been deluged with information about jobs and now they are all indicating that internships are also available. If you have students interested in the ski industry have them contact me or contact their local resorts. The three major resorts in Summit County Colorado are going to be short 1000 employee each. Aspen is short 600 employees before the snow guns are turned on.
