

The Landsport department at the US National Whitewater Center is currently interested in increasing the strength of our employment team for the 2011 season. Training for the 2011 season will begin as early as March, while employment typical begins between March and May. Those who are working towards or have received a degree in outdoor recreation, experiential education, commercial recreation, hospitality, or any other related field are strongly encouraged to apply. Our program is great for internships and entry level positions.

We are reaching out to colleges and universities with recreation based programs to help with our search. Please send information regarding any upcoming job fairs, internship fairs, or ways to post current positions at your institution so that we may communicate effectively to your students and graduates.

More information about our facility and employment, including training dates, can be found at <http://usnwc.org/programs/landsport-guide-school/> . Information about your programs and ways to reach your students can be emailed to climblead@usnwc.org.
