

Google Sites Add Gradient Backgrounds

Introduction

This handout explains how to apply a horizontal or vertical gradient to a Google Site. The following activities are accomplished by going to More actions > Manage site > Site appearance.

Add a Horizontal Gradient background image

Note: the assumption below is that you made your gradient background 974px wide with a shadow of 12px on either edge and will set your site width to 950px.

- Under Site layout
 - Change site layout > Site width –set to 950px > OK > Save Changes.
- Under Colors and Fonts
 - Page background image > Browse and select image > Open > Repeat: vertical > Horizontal Position: center > Vertical Position: top > Save Changes.

Add a Vertical Gradient background image

- Under Colors and Fonts
 - Page background color > Custom > Type in the hexadecimal color for your background starting with #.
 - Page background image > Browse and select image > Open > Repeat: horizontal > Horizontal Position: center > Vertical Position: top > Save Changes.
