**WHAT IS A PREFERRED DRUG LIST?**

A preferred drug list is a list of medications covered by your prescription drug plan. The **North Carolina Teachers’ and State Employees’** drug list has been compiled by a committee of North Carolina physicians and pharmacists organized by the plan. It includes medications made by most pharmaceutical manufacturers and for a variety of conditions.

Using preferred medications can help you save money on your prescriptions. When you use a medication on the preferred list, your co-payment (for up to a 34-day supply) will be:

|  |             |
|--|-------------|
| Generic drugs  | <b>\$10</b> |
| Brand-name drugs (without a generic equivalent)  | <b>\$25</b> |
| Brand-name drugs (with a generic equivalent)   | <b>\$35</b> |
| Nonpreferred brand-name drugs and other drugs as determined by the Pharmacy & Therapeutics Committee | <b>\$40</b> |

**WHAT ARE MY CO-PAYMENTS?**

|  | <b>(Up to a 34-day supply)</b> | <b>(35–68-day supply)</b> | <b>(69–102-day supply)</b> |
|--|--------------------------------|---------------------------|----------------------------|
| Generic drugs  | \$10                           | \$20                      | \$30                       |
| Brand-name drugs (without a generic equivalent)  | \$25                           | \$50                      | \$75                       |
| Brand-name drugs (with a generic equivalent)   | \$35                           | \$70                      | \$105                      |
| Nonpreferred brand-name drugs and other drugs as determined by the Pharmacy & Therapeutics Committee | \$40                           | \$80                      | \$120                      |

**WHY SHOULD I USE GENERIC DRUGS?**

All generic drugs are preferred medications. Ask your doctor to authorize generic substitution whenever a generic alternative is available. You will save money using generic drugs, since the co-payment is \$10 for a 34-day supply.

Generic drugs, like brand-name drugs, must meet established Food and Drug Administration (FDA) standards of quality and purity to help ensure their safety and effectiveness. Generic versions have the exact same active ingredients as their brand-name counterparts, and they are equal in strength and dosage. Sometimes drug manufacturers use different inactive ingredients, such as fillers and dyes, to provide a drug’s shape, color, size, and taste.

By prescribing generics and preferred brand names, your doctor can help you save money. Remember to bring this list with you each time you visit your doctor.

**Please note:** This is not a complete list of preferred drugs. In some cases, the Plan may have certain coverage limits. Some drugs require prior authorization or may be subject to quantity limits. Refer to your benefit materials or call **1 800 336-5933** for specific coverage information. You can also refer to **www.statehealthplan.state.nc.us** for a complete preferred list. This list is subject to change.
