

# The AD/HD Clinic at UNCG Is Conducting a Study on

## **The Effects of Stimulant Medication on the Intelligence Test Performance of Children with AD/HD**

Your child may qualify to participate if

- He or she is between the ages of 8 and 14, and
- Has been diagnosed with AD/HD, and
- Is taking stimulant medication

Children will take an IQ test during 2 testing sessions with each session lasting about 1 hour. The sessions will be held at the AD/HD Clinic located at 200 E. Northwood Street across from Moses Cone Hospital. Families will be paid \$40 for their participation and parents will receive a summary of their child's test results.

If you are interested in being contacted to find out how your child can participate in this study, please complete the requested information below and mail this form in the attached envelope or call Jennifer Smith Adams at (336) 346-3196, ext. 704.
