

# Volunteers Needed:

## Research on Memory, Study Strategies, and AD/HD

---

Volunteers are needed to participate in a research study designed to explore how AD/HD affects memory and study behavior. Adults ages 18 – 40 who meet research criteria are invited to participate.

### **What will I do?**

During two 90-minute sessions, you will be asked to complete several computerized memory tasks and questionnaires. If you consent, the study team will use some of your evaluation results so that you do not have to give this same information again. All information you provide will remain completely confidential.

### **What are the benefits to me?**

You will receive \$50.00 for your time participating. You will also receive a brief report detailing your performance on the memory tasks and providing information about study strategies.

### **Why are you researching AD/HD and memory?**

The goal of this research is to learn more about AD/HD and memory and to develop specific study strategies that will help people with AD/HD to learn and remember more effectively.

### **How do I get more information?**

Please call 346-3196 Ext. 306 or email LEKNOUSE@UNCG.EDU for more information or to schedule a session.
