

PPE Selection

(Level of protection must be greater than minimum protection required)

Hazard

Appropriate PPE

Impact:	
Flying objects:	
Noise:	
Thermal:	
Environmental, heat/cold:	
Ultraviolet Radiation:	
Penetration:	
Dust:	
Chemical:	
Falls:	
Compression:	
Bloodborne Pathogens:	
Electrical shock and arc flash:	

How will PPE selections be communicated to employee?

Existing employees will attend training for hazard assessment and PPE selection; new employees will receive training as part of orientation by their direct supervisor before starting work.

Required training included:

- When PPE is necessary.
- What PPE is necessary
- How to properly, don, doff, adjust, and wear PPE.
- The limitations of PPE.
- The proper care, maintenance, useful life, and disposal of PPE.
