

Hey, my name is Nathan, I chose to accept the Teaching Fellows offer and thankfully they were accepting of me also.

It has offered a lot of opportunities to expand my horizons in the educational field.

It helped me to see that I wanted to stick with secondary education because they allowed me the opportunity to go to an elementary school one semester, a middle school another semester and a high school also to do internships so it really solidified my foundation in what I wanted to do with my career after college.
