

Web3 Project Team

02-16-2006

Present: Miriam Barkley, Bo Bodenhamer, Scott Brewster, Jaysen Buterin, Jason Fleck, Gerardo Garcia, Andrew Marker, Kevin McClain

Absent: Todd Sutton, Anita Warfford, Robert Owens

Recorder: Sherri MacCheyne

Membership

Julia Rhinehart will be serving as an adjunct member.

UWDG – Budget

The WOC has approved the budget in theory. Each person will go to their respective Vice Chancellor for approval. Sherri will send the documentation and invoice to the divisions.

Calendar

The WOC needs a needs analysis for the public calendar. In order to make the project successful, we need to ask the entire campus what they want. We then need to determine if we develop it, or outsource it.

The WOC agrees that we need a calendar system. Web3 can spin off groups as needed to get this project going.

Action: Web3 to review calendar documentation we currently have

Action: Miriam to ask Jen if this serves the public meeting law.

The WOC committee needs to go to their VC's if they feel something is necessary to have.

There is not central calendar solution that meets our needs.

Web Site Requirements

The requirements passed and are located on the WOC web site. There are a few structural and grammatical changes to be made.

Action: Miriam to post in Campus Weekly

We don't have a way of monitoring the web sites. We could try to obtain a list of the web sites on campus.

Content Management

ITS is using Contribute software to manage their web sites. Contribute is designed to work with the lowest common denominator and is used to control access to pages. Todd Sutton stated that ITS will use it for a bit and then bring it back to Web3.

Portals

Gerardo will give a Blackboard presentation to Web3 on February 23 at 10am.

Certification

There are two more workshops. It seems like people are “getting it.”

Rob has 2 classes set up for March.

Miriam is still working on a “UDWG Social” schedule.

Web Environment

Andrew Marker is working on a project that is analyzing a needs assessment for the web environment. This includes technology and applications. There will be interviews of various groups as well as focus groups.

Google

Miriam received a comment through the web site regarding the search on the UNCG home page. When one does a search, sponsored links come up on the side, some of which are for adult content.

Action: Andrew/Miriam will work on setting up an account that searches UNCG specifically and does not contain sponsored links.

Image Repository

A meeting took place between the Library and University Relations regarding an image repository system. The Library may be the home for this repository with UR providing the images.

Miscellaneous

Vision Studio 2006 is now available.

The next meeting is March 16, 2006.
