

Web3 Project Team

06/22/06

Present: Miriam Barkley, Bo Bodenhamer, Scott Brewster, Jason Fleck, Kevin McClain

Absent: Jaysen Buterin, Andrew Marker, Richard Cox, Rob Owens,

Recorder: Sherri MacCheyne

Certification

How do we determine who passes the exam? It is possible for folks to pass the certification test without attending the classes?

The test will encompass several items – validity, university identity, as well as the basics of importing an image link, etc.

All Web3 members should take the certification test. (All present agreed to take the exam).

Kevin McClain will be offering a day long crash course for certification.

Level 2 Certification

Should level 2 be geared toward designers? Should we use Element K as a teaching tool for CSS? Should the classes include basic forms?

Unix Server update

Andrew Marker mentioned that scripts still running in Unix Server have 3 events running on ports that need to be changed:

1. host cgi scripts
2. using a virtual host
3. redirect to url.

Port 8000 and 8443 are going away. A notice needs to be set up telling users that the pages have moved.

Membership

Should we expand our group? Perhaps invite Sean Farrell from HR?

Workshops

1. Proper use of tables – forms
2. Basic connectivity
3. Streaming Video
4. CSS

Web Manager

HR made an offer to Paige Ellis for the Web Manager position.

Meeting dates

Miriam will send out an email to see what alternate dates/times are desired for the web3 meetings.

Miriam will manage the meeting schedule/room selection and confirmations.

The next meeting is Thursday, July 13, 2006.
