

Web3 Project Team

09/28/2006

Present: Miriam Barkley, Scott Brewster Jaysen Buterin, Richard Cox, Paige Ellis, Jason Fleck, Andrew Marker, Kevin McClain, Rob Owens, Todd Sutton, Anita Warfford

Absent: Bo Bodenhamer

Recorder: Sherri MacCheyne

Membership

Richard Cox passed out a document entitled “Web3 Membership Qualifications.” After some discussion and review, it was determined that Richard would add a bullet about technical level, membership term (in years) and remove intercollegiate athletics.

There was also some discussion regarding level 1 certification – should it be a requirement for membership? Would we then want to change it to level 2, or would that be setting the bar to high?

The Web3 Project Team is the technical arm of the WOC.

We should add an Element K BrainBench course for accessibility. It doesn't have to be a master level.

Should there be a cap? Participation and attendance could be a valid reason to remove a member.

CSS for handhelds

Richard is currently working on this.

Level 2 Certification Committee

The following are members of this subcommittee: Anita Warfford, Richard Cox, Andrew Marker, Jason Fleck, Jaysen Buterin and Rob Owens

Roundtables

Some discussion was made regarding having some of the roundtables become open labs. Perhaps the 3rd Monday of each month – 1 hour open lab.

The next meeting is Thursday, October 12, 2006.

(Location to be determined.)
