Term Papers and Presentations

Due Dates: Week of November 13, 2006.

Each student should investigate one of the topics listed below, and present his/her studies in the form of a term paper. Further, each student will give a short presentation of his/her studies to the class.

Topics for this semester include:

1. Services and functionalities offered by a commercial database system (MS SQL server, Oracle, IBM DB2) for XML.

2. Information integration and interoperability (a few papers on this topic are listed below.)
