Question 1 (20%)
Using DTD of Fig. 10.15, write the following queries in XQuery:
(a) List all books authored by Ullman.
(b) List journals that published an article on XML in 2001.

Question 2 (40%)
Answer Question 10.16 of text.

Question 3 (30%)
Consider the XML document on next page. Write an XML query to restructure the document: The result should show the courses, and the students who are taking each course as subelements of courses.

10% of the assignment mark is for typesetting/typing
