A bibliography of recent publications on uncertainty in database and knowledge-base systems

Disclaimer: This bibliography contains, with a few exceptions, articles published since 1990 related to the modeling and management of uncertain and inaccurate information in database and knowledge-bases. It is by no means complete. Rather, it is a *complement* to other bibliographies such as those found in Zaniolo *et al* [62], Motro and Smets [42] (on Uncertainty Management in Information Systems), and Parsons [49] (on Imperfect Information in Data and Knowledge Bases).

Surveys and Tutorials

W. Buntine [5]; V. S. Lakshmanan and F. Sadri [32]; A. Motro and P. Smets [42]; S. Parsons [49]; C. Zaniolo *et al* [62].
